

Scott Hoostal

Minneapolis, MN | 952.221.4216 | hoostasr@gmail.com

Summary

Multidisciplinary Full Stack Web Developer with a passion for learning new technologies in startup and professional business environments. Adept at working autonomously and collaborating cross functionally with teams; my goal is to creatively challenge myself everyday in order to increase my understanding about the intersection of technology and business.

Education

Full-Stack Web Developer Certificate from the University of Minnesota 2020

Full time program that teaches the MERN stack of web development. Gained experience building API's and using: React, HTML5, CSS3, JavaScript, JQuery, Node, Bootstrap, Express, Git, Mongo DB, MySQL.

Software Portfolio: <https://500inthegraveyard.github.io/ScottPortfolio/> | GitHub: github.com/500inthegraveyard

Bachelor of Arts from the University of Wisconsin Eau Claire 2009

Major: Political Science

Professional Employment

Technical Operations Analyst. October, 2020 – Present, Icario. Responsible for production database querying, troubleshooting, and research; as well as AWS cloud infrastructure management/troubleshooting.

- Daily experience with SUMO log searches, AWS (EC2,ECS,S3,SQS,RDS), and New Relic monitoring
- Application bug fixes made in ruby and javascript stored on github
- Built application monitors in Data Dog.

Technician and Support Specialist. January, 2020 – May, 2020 Emkat Solutions a Barcodes Company. Responsible for the completion of the diagnosis, repair, and programming of mobile devices for our customers;

- Performed image creation and loading for numerous mobile devices
- Maintained Mobile Device Management (MDM) platforms for multiple customer sites
- Gained a deep understanding of SOTI MDM software, Zebra Setup Utilities, and Oracle NetSuite

Product Manager. April, 2015 - February, 2019 GTL (Renovo Software). Owned the full life cycle of numerous products that used Android based tablets as the main hardware component to enable users secure access to custom mobile applications.

- Oversaw the creation and deployment of over 10,000 Android tablet kiosks in the U.S, a completely new product for the company, and assisted with three similar products
- Managed onsite Mobile Device Management and OTA firmware updates
- Experience creating and managing JIRA projects, backlog grooming, and user stories
- Trained technical support team, marketing, field technicians, QA, sales engineers, and others on several aspects of my product to create a support and sales infrastructure
- Technical field experience with power over ethernet devices, video calls, networking, troubleshooting tablets, and many other hardware/software features

Data Specialist. June, 2013 - April, 2015 UnitedHealth Group. Processed secure client information through numerous databases.

- On the Resource Partners team in the Medicare and Retirement division I extracted and uploaded data from medical assessments using CareOne, SharePoint, and Excel
- Sync large data sets across multiple healthcare sites by collaborating with a large team

Head Technician Manager. May, 2012 - September, 2012 Alta Planning and Design. In San Francisco I headed the launch of the first ever bicycle share system called Bay Area Bike Share.
